

How A Social Security Lawyer Can Be Beneficial

While many people opt to handle the process of applying for Social Security benefits by themselves, there are many instances wherein hiring a Social Security lawyer can make things a lot easier. Since errors made at the start of the application process results are a common occurrence, many claims for disability benefits are often denied. The good news is that these decisions can often be reversed in favor of the applicant, once he or she hires an experienced Social Security lawyer to assist in the appeal process.

How long will it take before you are covered for Medicare?

If you currently receive Social Security disability benefits, you will automatically be qualified for Medicare benefits. Information about your Medicare benefits and your Medicare card will be sent to you shortly before you reach the age of 65 or before your 24th month of disability. In some cases, you may not be enrolled automatically in the Medicare program, particularly if you are not currently receiving any Social Security benefits. In this situation, you will have to set up an appointment with the office of the Social Security Administration. Upon the processing of your application, the Social Security office will then determine if you are eligible for the Medicare program.

What if I lack one or more credits for disability insurance?

One of the requirements for being eligible for Social Security Disability Insurance benefits is that you should have received a certain number of credits for the work you have done during a specific period and you should have earned a specified amount during the ten years prior to your disability. A credit is equivalent to a quarter of the calendar year. According to Social Security regulations, you should have earned a specified amount in dollars during a quarter. To be eligible for Social Security Disability Insurance, applicants need to have credits equivalent to at least 20 quarters or 5 years worth, over the past 40 quarters or the ten years previous to becoming disabled.

Working while you have a Social Security claim pending

A common misconception that many people have is that they cannot apply for Social Security disability benefits while they are working. The truth is, you are allowed to file a disability claim and receive benefits while you are presently working. Keep in mind however that your monthly income cannot be higher than your SGA or substantial gainful activity amount, which is \$900.00. The reason behind this restriction is that the Social Security Administration assumes that if you are able to work and earn more than the SGA, you are not legally considered disabled.
